

THE ENVIRONMENTAL COMMITTEE

DATE: 10-09-2024

- Agenda:**
1. To form an environmental committee
 2. To Decide objective and function.
 3. To develop new plan of action for environmental sustainability

Green Audit:

A “Green Audit” also known as an environmental audit or eco-audit, is an independent assessment of a College & Environmental performance. The audit evaluates the College’s compliance with environmental regulations, resource utilization.

Green Audit can be a useful tool for a college to determine how and where they are using the most of the energy or water or resources; the college can then decide how to implement changes and make savings.

Recommendation:

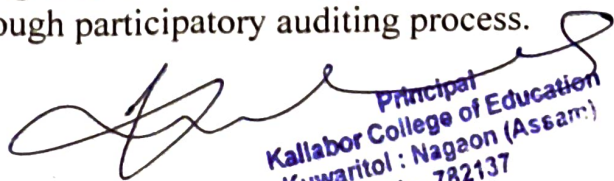

On the basis of “Green Audit” recommendations the committee is formed. They recommended that clubs and cells pertaining to environment, ecology and climate change such as eco-clubs, college environment and climate cells etc. should be constituted.

Objectives:

1. It’s objective was to enhance today’s educational institutions which should be more environmentally concerned and more eco-friendly in nature.
2. It’s motive was to examine the institutions green practices and compile and in-depth audit report to establish where they stand on the environmental coherence.
3. It’s main objective was to form the environmental committee for the betterment of the college in near future.

Functions:

1. It’s main functions was to carry out a baseline survey in order to ascertain the actual state of green practices within the educational institution.
2. To raise students and staff members and teachers understanding of environmental consciousness.
3. To aware generation among students concerning real issues of environment and it’s sustainability through participatory auditing process.

4. To organize seminars, workshops and awareness drives on environmental issues like climate change, pollution and conservation. To promote eco-friendly practices such as waste segregation, recycling and water conservation.
5. To monitor the implementation of green initiation such as energy saving measures or pollution control. Evaluate the effectiveness of sustainability programs.
6. To organize activities for World Environment Day, Earth Day and similar events to raise awareness.
7. To conduct campaigns, poster-making competitions and street plays to educate peers about environmental issues. Share information about eco-friendly practices through newsletters or social media.
8. Organize plantation drives to increase greenery and biodiversity. Care for planted saplings within the school, college or community premises.
9. To promote waste segregation and recycling among students and staff.
10. To promote rainwater harvesting, water recycling and reduction of water wastage.
11. To collaborate with local communities to spread awareness about environmental conservation.

Environmental & Eco-Club Committee:

In-Charge : Kriti Basfore
Member : 1. Ankita Roy
2. Sabita Borah
3. Trideep Borah
4. Aishorya Bharati

GENERAL MEETING ON GREEN CAMPUS

DATE: 25-09-2024

Agenda: Plantation for green campus including “Orchid House”, “Mushroom Farming” and “Rain water harvesting”.

Discussion:

A general meeting was held on 25th September 2024 at Principal's Chamber. The committee took the resolution on working for green campus for Kaliabor College of Education. Some expensive and rare plants has been planted in our campus.

Plantation of “Orchid House” was also done to collect and preserve different types of orchids. It will help to cultivate and showcase a variety of orchid species. It also enhances the campus's visual appeal, creating a serene and beautiful environment. It will also attract visitors, acts as a stress-relief zone for students and staff, fostering mental well-being.

“Mushroom Farming” was also done at our college premise to maintain the green campus at our college. It will also keep to promote sustainable agriculture, entrepreneurship and practical learning.

“Rain Water Harvesting” was also done at our college to collect and store rainwater for future use. All the activities have been done in the collaboration with “Brahmaputra Valley Aromatic Oil Industry”. The concept aligns with environmental education, bio-diversity conservation to promote environmental sustainability through systematic tree plantation and greenery development on campus.
